

Business Presentation 2024

The Iboga shrub

Tabernanthe Iboga is a dicotyledonous plant of the family Apocynaceae, subfamily Rauvolfioideae, found in Africa's equatorial forests. It is a small shrub that can reach six meters high. This species is rich in indole-monoterpene alkaloids, mainly ibogaine.

It is used in traditional African medicine to produce a stimulating and regenerative effect by chewing the root or bark.

Note that the plant reaches maturity in five years, and the quality of alkaloids increases the older the plant grows.

Iboga offers the potential to change the treatment of addiction and various disease states fundamentally. Its unique mechanism of action works on a range of receptors in the brain to produce powerful results with the potential to address the global challenge of opioid addiction.

The Iboga Ecosystem

Culture and Harvest

- Volume production
- Predictable yield
- Consistent quality

Gross value: ~ 1500 \$ - 2500 \$ / kg

Production

- Root Bark
- Total Alkaloids
- Ibogaine HCL
- GMP/ISO Certification

Value Ibogaïne HCL: ~ 160 \$ / gr

Sales

- Co-development of drugs
- Intellectual property licensing
- Derived products (capsules, drinks, creams, etc.)

Services / Products

- Addiction Clinics
- Medical Tourism
- Spiritual Retreats
- Health resorts

Value: ~ 7 000 \$ - 10 000 \$ / Session

The different transformations

- Root bark and powder
- Micro dosage
- Food supplements
- Cosmetic products
- Homeopathic products
- Essential oils
- Energy drinks
- Alkaloid extracts (ibogaine, etc.)
- Etc.

Capsules

Tablets

Cream

Essential oil

Energy drink & flavored water
(made from natural fruits)

Alkaloids extracts...

Brainbooster

BRAINBOOSTER is the first product available for sale. It comprises 100% bark and roots of *Tabernanthe iboga*, a plant of around twenty indole alkaloids.

- Brainbooster treats influenza, convalescence from infectious diseases, neurasthenia, and sleeping sickness.
- Brainbooster is an excellent regulator and tonic of the circulatory system; this action strengthens the immune system.
- Brainbooster is especially remarkable because of its tonic action on nutrition, which increases respiratory exchanges and assimilation and disassimilation processes.
- non-addictive properties,
- Brainbooster cures psychosocial effects,
- Brainbooster is not just a health product; it's a lifestyle enhancer. As a psychostimulant, it heightens perception and vigilance, allowing you to stay alert for extended periods. It's the boost you need to power through your days.

Status at Q2 2024

Assets

Large Iboga plantation (updated: Q2 2024) – Bibasse/Oyem (GABON):

- ❑ **5 hectares of 7-year-old Iboga: 19200 plants, expected yield – 7 680 kg of root bark**
- ❑ **3 hectares of 6-year-old Iboga: 12 800 plants, expected yield – 5 120 kg of root bark**
- ❑ **3 hectares of 4 ½-year-old Iboga: 9 600 plants, expected yield – 3 840 kg of root bark**
- ❑ **2 hectares of 3 ½-year-old Iboga: 10 000 plants, expected yield – 4 000 kg of root bark**

The area under cultivation **13 hectares** / The total area of the plantation is **20 hectares** with the possibility of extension

Total number of plants 51,600 plants

- Mapping and setting up a network of local planters for the purchase of raw materials
- Bolokoboue GRAINE village available for training and setting up nurseries
- Made in Gabon processing house certified to the standards of the Gabonese Food Safety Agency (AGASA)

Development

- ❑ IBOGABON can now, thanks to its plantations, offer a certified, compliant, and legal source of Iboga
- ❑ IBOGABON supports small planters and invests in new plantations in different country areas.
- ❑ IBOGABON has strategically signed partnership agreements with reputable laboratories and universities in South Africa and the USA. These collaborations drive groundbreaking research on Iboga as a potential treatment for multiple pathologies, reinforcing our commitment to innovation and excellence.
- ❑ IBOGABON builds partnerships abroad and promotes its Brainbooster in several regions: the USA, France, South Africa, Zambia, Burundi, Ivory Coast, Burkina Faso, Cameroon, and Congo.
- ❑ IBOGABON collaborates with partners such as Forest Value for the development of plantations and the financing of a GMP laboratory
- ❑ Iboga is regulated in many Western countries, and Gabon now recognizes its economic and social potential. The government's initiative to organize an international forum on iboga is a significant step towards establishing a global framework for managing this valuable resource, paving the way for a promising future in the industry.

Action Plan

- Construction of new germinators (8m X 1.20m) with a capacity of approximately 24,000 plants each, i.e. a production varying between 72,000 and 96,000 plants per year per generator
- Rejuvenation of the team and recruitment of 2 agronomists for better monitoring of production and reduction of fruit losses
- Equipment of the processing house at an optimal level to meet the demand for capsules and the launch of other products
- Relaunch of the planting program on the 7 hectares developed (ready to plant in Oyem) and extension on 10 additional hectares
- Acquisition of a 9-hectare site in Akanda (Libreville)
- Development of a seed field (4 hectares) for monitoring and evaluation of the different varieties
- Development of new plantations in Gabon and in the sub-region
- Construction of an analysis and extraction laboratory
- Development of a processing center (medical tourism)

Management team in Gabon

Hervais OMVA
General Manager/CEO
Agronomist/sociologist

For more than 10 years, coordinator of the NGO IDRC Africa, which offers technical assistance missions to institutions, local authorities, businesses, professionals, associations and also individuals. A pioneer in the agricultural sector, its activities are focused on Gabon but take into account all the socio-economic problems of the countries in the region and the world.

Ivan BIYEGHE
Operation manager/COO
Business Consultant

For nearly 5 years Regional Director of Falcon Eye International which is an Israeli entrepreneurial company focused on identifying, creating and realizing business opportunities worldwide. He specialized in creating business relationships bringing together clients and companies, needs and solutions, projects and financing.

Thank you
